

**ADAPTO
PENCIL TORCH**

PRODUCT DATA SHEET

THE ADAPTO PENCIL TORCH IS A PRECISION INSTRUMENT WITH MULTIPLE USAGE. IT IS IDEAL FOR DENTAL WORK, MODELMAKING AND ALL SOFT SOLDERING PROJECTS.

The Adapto Pencil Torch is for use only with Natural Gas and provides a long thin flame which is ideal in situations where high heat is not required.

The Jet of pure natural gas entrains the adjacent air for complete combustion. No air pump or blower fan is required.

The needle valve precisely controls the flame length of up to 80mm. The torch will operate in any attitude. The solid, stable base gives static positions of 30, 60 or 90 degrees.

HAND HELD

The Pencil Torch has an insulated stainless steel barrel which remains cool during intense use making it ideal for hand held use.

MULTIPLE USE

The Adapto Pencil Torch was designed primarily for Flame-brushing wax moulds by dental technicians but has been found to be ideally suited for many other uses including soft soldering and small silver soldering projects.

According to the Health & Safety at Work Act 1974, BS 4163 and COSHH Regulations it is mandatory that all fumes must be removed at source.

MAXIMUM HEAT RATING

Natural Gas	500Btu.	0.15Kw
-------------	---------	--------

OPERATING GAS PRESSURES

Natural Gas	20 mbar
-------------	---------

ELECTRICS

An electric supply is not needed for the operation of the Pencil Torch.

STANDARD EQUIPMENT

- ◆ Aluminium Base
- ◆ Flexible tubing
- ◆ Adaptor

IMPORTANT SAFETY NOTE

The Needle valve which controls the flame length is not an Isolating Valve. The gas supply should be turned off whenever the torch is left unattended.

◆ Please state type of gas when ordering ◆
